

Wire Stress Relieving Device DEG-5/2

Improves the tensile strength to yield strength (Rm/Re) ratio
Improves the total uniform elongation (Agt)
Presetting of the upper stress relieving rollers pneumatically (hydraulically as an option) cylinder
Adjustable via threaded spindle
Stress relieving rolls out of tool-steel with tungsten carbide inserts

Technical specifications

Wire diameter (low carbon)	5,0 - 8,0 mm
Wire diameter (high carbon)	-
Wire passing speed	up to 8,0 m/s
