

Wire Stress Relieving Device DEG-S7/EZ

Improves the tensile strength to yield strength (R_m/R_e) ratio
Improves the total uniform elongation (A_{gt})
Stress relieving of the wire rod due to a proven 7 roller straightening unit in two planes
Electrical presetting of the upper stress relieving rollers
Long lifetime stress relieving rolls

Technical specifications

Wire diameter (low carbon)	5,0 - 16,0 mm
Wire diameter (high carbon)	-
Wire passing speed	up to 8,0 m/s
