

Wire Stress Relieving Device DEG-S7/1

- Improves the tensile strength to yield strength (R_m/R_e) ratio
- Improves the total uniform elongation (A_{gt})
- Stress relieving of the wire rod due to a proven 5 roller straightening unit in two planes
- Presetting of the upper stress relieving rollers pneumatically (hydraulically as an option) cylinder
- Adjustable via threaded spindle
- Stress relieving rolls out of tool-steel with tungsten carbide inserts

Technical specifications

Wire diameter (low carbon)	5,0 - 16,0 mm
Wire diameter (high carbon)	-
Wire passing speed	up to 8,0 m/s
