

Wet Coating Machine HBE-3302

For wire coating and drying
Suitable e.g. for lubricant carrier coating
Highly energy efficiency due to an innovative design
Suitable for mechanical descaled as well as pickled wire rod
Almost entire machine processed out of durable stainless steel
Extensive control and monitoring features for a safe production process
Automatic tank fluid level and temperature control combined with automatic refilling

Technical specifications

Wire diameter (low carbon)	5,5 - 10,0 mm (greater on request)
Wire diameter (high carbon)	5,5 - 8,0 mm
Wire passing speed	up to 4,0 m/s
