

Double Head Sanding Machine SEZ-4-300

For cleaning sanding or removing surface defects by means of 2 sanding belts as well as optionally by means of a pressing device
30% more sanding surface than commercially available allows for particularly long sanding belt life and best productivity
Suitable for any wire quality
Flyer and both sand belt speeds independent and separate adjustable
Noise-proof design on high level
Inlet and outfeed sanding belt driven by separate motor (coarse and fine sanding possible)
Automatic belt tear control

Technical specifications

Wire diameter (low carbon)	5,5 - 9,0 mm (opt. 30 mm)
Wire diameter (high carbon)	5,5 - 9,0 mm (opt. 30 mm)
Wire passing speed	up to 2,4 m/s
